### SEVEN SPEAKERS GIVE ENVIRO STEREO

A new stereo radio cassette player, designed to recreate the quality of a concert hall wherever it is played, will soon be available in Adelaide for about \$345. It is the Williamsons portable radio cassette with Enviro stereo, seven speakers, six-band radio and 13.5 watts RMS power output. Enviro stereo is a new concept designed to produce multi-dimensional sound quality. Sounds of different weight and pitch are separated and fed into seven different speakers, while balanced woofers and squawkers reproduce the true color and texture of the music.

Designed for powerful performance with a continuous power

output of 13.5 watts RMS, it is also ideal as part of an audio setup used either as a stereo cassette deck or a stereo amplifier.

There are two easy-to-read VU meters for playback, record and battery levels as well as the tuning signal strength and a pause control for immediate stop and restart during record or playback.

Single channel input is fed through speaker groups on each side of the set and where a stereo strength is received the mainly treble sounds can be switched from one side to the other with a flick of the control switch.

The variable sound monitor enables you to record and listen to the recording at a higher volume at the same time without affecting the recording level.

### BIG PUNCH

The Williamsons Enviro Stereo is not a conventional portable radio cassette, as I found to my enjoyment during an exhausting six-hour test. Exhausting for me, that is. I didn't faze the unit at all. It is easy on the eye, the ear and, for what it can do, its \$345 price tag makes it surprisingly easy on the pocket.

A profusion of knobs, dials, push-buttons and switches at first makes the unit look a little confusing, but is soon apparent their number and positioning make for ease of operation.

During the six-hour test there was no hint of vibration from any of the unit's seven speakers — even at its ear-shattering best. For its size (49 cm x 27 cm x 15 cm) it is light, easily carried about and built to take some hard knocks.
